

6 Warnings

I have several immediate warning I want to give you that will protect you from what's to come. The First Warning is a concept called The Pretext Phone Call. The Pretext Phone Call is when the Police have a child or a relative of the child place a phone call to you. The theory behind it is the Police want to get you while your guard is down and get you to confess to something. While the phone call is being made its normal practice for the Police to be sitting there feeding questions, written down on pieces of paper to the individual who placed the phone call. The concept is okay and it is legal. However, it is misused. Think about getting a phone call from somebody that says you abused me; if you say I'm sorry I won't go to the Police. Well, that puts enormous pressure on somebody who is innocent to say I'm sorry. In that way it's over and they don't have the Police involved. However, when those words, "I'm sorry" are later played back to a jury its going to sound like I'm guilty. What we recommend is that if you get one of these calls just say no, nothing happened and hang up. You do not want to spar with the Cops that are on the other end of that phone call. Stay away from it and immediately call us.

The Second Warning is that at any time you are going to be subject to a Search and Seizure a Warrant may be issued and your house searched, your car searched and your computer searched. If this should happen, do not interfere with the Police Officers. You do not want charges of Obstructing a Police Officer to complicate this matter.

The Third Warning has to do with talking to the Police. Most people believe that if you don't talk to the Police the Police will think you are guilty. Well, it doesn't matter what they think. What matters I the evidence. The Police have been trained in the Reid Method of Interrogation. Now, you haven't heard about that before but let me tell you this. Back in the 1930's and 1940's

the Police could beat you with a rubber hose to get a confession. The Reid Method of Interrogation is a psychological rubber hose. You can be beaten with that psychological rubber hose and I guarantee you that you'll confess to killing your mother even if she's still alive. It's that powerful. That is why we tell people do not be interviewed. Do not be subjected to an Interrogation. Ask for an attorney. Assert your Rights to Remain Silent. You should do that whether you are guilty or innocent. What comes out of those interrogations can hurt you...even when you are innocent.
